Hello from the Crew at Broken Heart Ranch,

Welcome to our 32nd annual production sale. We are now a multi generational family based operation and over the past 40 years we have made many changes and improvements. We still maintain the basic essentials which include having structurally correct, easy fleshing females that are functional and will provide profit in today's industry. Red Angus genetics are quickly becoming the cornerstone for many of today's commercial cattlemen and we believe that they will help add value and consistency to your herd.

This past summer we had the opportunity to be a part of the Genex tour with visitors from Brazil and Argentina. We were also privileged to be a part of the National Junior Red Angus tour. The kids did some cattle judging, watched a demonstration on cattle handling and viewed some of our cattle. What a nice bunch of kids! Thanks for making us a part of your JRA tour.

We breed our cattle to be deep bodied, long sided and heavy muscled. We cull hard for structure, productivity, efficiency and disposition. We stand behind our cattle because our reputation depends on how they perform. Some of our customers have been buying bulls from our program for 40 years. We thank you for the confidence you have shown in our program. The past two winters have been challenging at best and we believe we are offering a set of bulls that should perform for our customers.

Our new herd sires have performed well for us as well as several new AI sires. We will ultrasound the bulls that are old enough in February and a supplement sheet will be available on sale day along with the scrotal measurements. Check our website for updated carcass information as well as color photos of the bulls. The cattle are listed in birth order in the catalog. We will have a sale order sheet available on sale day. We have pointed out some ¾ brothers throughout the sale offering and feel they will offer a consistent package when marketing your future calf crops.

The bred heifers come out of our replacements. They were ultrasounded last fall and their due dates noted in the sale book.

We will deliver to central locations on major highways up to 300 miles. Bring your trailer and deduct $50 per head. We will deliver as time and weather permit. Please check with us on other arrangements.

Let us know if we can assist you in any way. The cattle can be viewed anytime. Visit our website at www.pedersonbhr.com for pictures of some of the cows and more bull pictures as well as further information.
SALE DATE:
Wednesday, March 3, 2010
1:00 p.m. MST
Storm date: March 7, 2010

SALE LOCATION:
At the Ranch — Firesteel, South Dakota
3 miles east, 11 miles north of Firesteel or

ACCOMMODATIONS:
Wrangler Inn, Mobridge, SD 605-845-3641  Mobridge Kountry Inn 1-888-882-2412

TERMS:
Half down, balance due when picked up or delivered.

DELIVERY:
It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls or bred heifers
picked up within three or four days will receive a $50 hauling refund. We will keep the bulls until March 20 at no charge but we will not be
responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon
as weather permits. We’re giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:
All cattle are on a complete vaccination program. No creep feed.

BREEDING GUARANTEE:
We guarantee all bulls to be breeders although we recommend you have the bulls semen tested a couple of weeks before
turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year’s sale. This
 guarantee is void if there is evidence of improper management in caring for the animal, or the bull’s inability to breed is due to sickness
 or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal
 measurements and ultrasound data on bulls that are old enough will be available sale day. Bulls have two shots of Fusegard. All bulls
born and raised on the ranch.

LIABILITIES:
All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents
which may occur.

INSPECTION OF CATTLE:
Bulls and heifers will be available for inspection at any time prior to the sale.
Dakota Copper is just one of those herd sires that makes breeding cattle fun. His females are top notch and they just keep getting better the older they get. There are over 900 registered Dakota Copper progeny recorded at the Red Angus Association with an average birth weight of 78 pounds. We believe his career is far from over and he will continue to be a corner stone for our industry. Crossing Dakota Copper and Logan 734B together is a consistent package that has worked well for us. Semen is available at ABS.

Bank Statement is a deep bodied, easy keeping bull with a great disposition. We were lucky enough to purchase him in partnership from the TNT Simmental and Red Angus operation from Almont, ND. He was brought on as a herd sire because you can never have enough sound made, heavy muscled, easy fleshing, and mild mannered cattle in the herd. We are very excited to see his daughters in production. During the Genex tour this summer he really impressed the South Americans. His sire Mission Statement is a proven performance bull with incredible carcass traits. Semen is available through Genex.

Durango was our top selling bull calf in 2007. We have used him on heifers and have really liked his calving ease and growth he passes on to his progeny. We plan on using him heavier in the future. The dam of Durango has produced three herd sires including Durango. This year she had her first heifer and it definitely is a good one. Semen is available through Genex.
REFERENCE SIRES

BHR Logan could be the best sire we have raised. His daughters are deep and thick and their udder quality and foot structure are unmatched. When tagging calves you can tell by the feet and udders that you are tagging a 734B daughter. We have used him for several years and the quality of cattle he gives us just keeps getting better. Semen is available.

Grand Vaquero is a calving ease machine that offers plenty of performance. We have used him on heifers with no problem and are impressed with how much growth his calves demonstrate. His daughters are deep bodied with great udders and are really easy fleshing cattle. We lost the bull due to an injury and semen is limited. The number of calves that will be offered in the future will be limited also.

SVR 73P is a Canadian bull we used semen on. We saw him a couple of years ago and the first two words you could think of were "how much?" Lisa was convinced then and still is, that we need to own him... we have yet to convince the Kaufmans at Southview Ranch of that though! He looks like a cross between Dakota Copper and Logan 734B. His calves are extremely deep ribbed with lots of volume. His heifers are feminine, functional and fabulous. Be sure to check out the new sire group! We think you’ll be glad you did.

Cartright is a powerful growth bull that offers a complete package of moderate birth and fleshing ability. His calves will definitely stand out when you see them. This bull’s high performance and carcass traits blend well with our cows’ maternal strengths. His first set of daughters are in production and we are excited to have more of them.

New Chapter is not just another Cherokee Canyon son, he is one of the most complete packages that Cherokee Canyon has ever sired. He sires calves that are thick, deep bodied and stylish, not to mention that he passes his mild mannered disposition on to his calves. New Chapter sired females are the type of cattle that elite programs are developed around.

New Chapter is just another Cherokee Canyon son, he is one of the most complete packages that Cherokee Canyon has ever sired. He sires calves that are thick, deep bodied and stylish, not to mention that he passes his mild mannered disposition on to his calves. New Chapter sired females are the type of cattle that elite programs are developed around.

Leland Destiny was the top selling bull at Leland’s a couple of years ago. He is a stout, square made bull in a moderate package. His calves are following the same profile that he is. We have been impressed with the muscle pattern and spring of rib his calves are showing.

Leland Destiny was the top selling bull at Leland’s a couple of years ago. He is a stout, square made bull in a moderate package. His calves are following the same profile that he is. We have been impressed with the muscle pattern and spring of rib his calves are showing.

Canyon 6032 is an ET calf that we purchased from Sid Brenner. We raised the sire of 6032, and felt when he sold he was one of the best calves we’d raised. Canyon 6032 is a super long sided bull with great muscle pattern. He sires growthy, long sided calves that are very classy in appearance. The maternal side of his pedigree is filled with donor quality dams.

This is a 73P (Reference sire E) son we are using on heifers. He is a long deep bodied bull with a small head and smooth shoulders. He is also a clean up bull for some of the bred heifers in our offering. We are excited about the 73P progeny and were excited to add this bull to our battery.

BHR Judge 640

BHR Judge 640 is a calving ease specialist we have used with tremendous success on heifers. He is a long bodied bull with outstanding feet and is in the top 11 percent of the breed for ribeye EPD. His sons should work well on heifers.

RED SVR Knight 221T

This is a 73P (Reference sire E) son we are using on heifers. He is a long deep bodied bull with a small head and smooth shoulders. He is also a clean up bull for some of the bred heifers in our offering. We are excited about the 73P progeny and were excited to add this bull to our battery.

Watch for Dakota Breeders Classic Horse Sale at Mobridge Livestock in September of 2010.

BHR GOLDEN BOY 9183

4/20/09  1319063  100% RA

• This is a deep, thick square made bull that has a great profile.
• He has a 70 pound birth weight and his weaning and yearling ratios are 113 and 110.
• His 15 for heifer pregnancy ranks him in the top 1% of the breed.
• 3/4 brother to BHR 905, BHR 9174, BHR 9175, BHR 9161

BHR GOLDEN BOY 9187

4/21/09  1318962  100% RA

• A good calf with decent numbers from birth to carcass
• He ranks in the top 1% of the breed for heifer pregnancy.
• Golden Boy cattle are very easy keeping cattle.

BHR GOLDEN BOY 9192

4/21/09  1318925  100% RA

• A dark red calf with excellent depth and shape of rib
• Ranks in the top 15% for weaning and yearling EPDs and the top 1% for heifer pregnancy

BHR GOLDEN BOY 9207

4/26/09  1318991  100% RA

• A 3/4 brother to BHR 9132, BHR 977

BHR DESTINY 9204

4/26/09  1319144  100% RA

• Big time performance in this younger Destiny son
• A calf with growth numbers that put him easily in the top 10% of the breed for weaning and yearling weights
• His weaning and yearling ratios are 119 and 115.
• His New Chapter dam has an MPPA of 107.
• 3/4 brother to BHR 9181

BHR DESTINY 9206

4/26/09  1319140  100% RA

• The great assets 9206 may possess are in the replacement females he sires.
• This calf is backed by phenomenal cow making genetic lines in his pedigree top and bottom—Logan 734B, Brown Vacation, Dakota Copper, Holden Highlight, to name a few.
• While he is more moderate in his growth profile than most other Destiny’s, don’t count him out sale day.

- This wide topped May calf has a lot of guts and meat packed into a moderate package.
- He has a balanced set of growth EPDs and an exceptional ribeye EPD.
- He is definitely worth looking at sale day.
BRED HEIFERS

These bred heifers were selected from the top of our replacement bred heifer pen. They were sorted to be high quality heifers, with a deep pedigree of very productive and useful cows backing them, and chosen because they were ultrasounded to calve near the end of March and the first part of April.

The heifers who were Ai-ed were cleaned up to Red SVR Gangster 49U, Red SVR Knight 221T, Red SVR Heavy Load 10T and BHR Grand Vaquero 855. Please refer to the reference sires for pedigrees and performance information for these sires.

The heifers were ultrasounded by Dr. Pat Bierman, Mandan Veterinary Clinic, with their estimated due date indicated.

**MISS BHR GRAND VAQUERO 810**

Bred AI to BHR Golden Boy 453B on June 11, 2009. Ultrasound due date is March 21, 2010.

**MISS BHR CARTWRIGHT 816**

Bred AI to BHR Golden Boy 453B on June 11, 2009. Ultrasound due date is March 21, 2010.

**MISS BHR CHAPTER ONE 829**

Bred AI to BHR Golden Boy 453B on June 11, 2009. Ultrasound due date is March 21, 2010.

**MISS BHR GOLDEN BOY 832**

This is a fancy Golden Boy daughter that has the right ingredients to be your next donor cow. She has a complete set of EPDs, with her Heifer Pregnancy being in the top 1% of the breed. She is long sided, deep and broody, with a long line of really good cows backing her. Her dam BHR Cut Above 325 is a stylish deep bodied gal with a great udder and has an MPPA of 105.

BRED HEIFERS

MISS BHR CHAPTER ONE 890
4/4/08      1254963       100% RA

LCC New Chapter A705L 
Miss BHR Logan 952

BRED AI to BHR Golden Boy 453B on June 12, 2009. Ultrasound due date is March 22, 2010.

The next five heifers were naturally bred in a multiple sire pasture. The sires in this pasture were: Red SVR Gangster 49U, Red SVR Knight 221T, Red SVR Heavy Load 10T and BHR Grand Vaquero 855. Please refer to the reference sires for pedigrees and performance information for these sires.

In order for the offspring from these heifers to be registered they will have to be parent verified. Broken Heart Ranch will reimburse the buyer of these heifers for the parent verification test. Please contact the Broken Heart Ranch crew for help or questions about the parent verification process — it is a simple test that only requires tail hair from the calf.

The heifers were ultrasounded by Dr. Pat Bierman, Mandan Veterinary Clinic, with their estimated due date indicated.

MISS BHR COPPER D 821
3/25/08      1254900       100% RA

Lchman Copper Rob 1204D
Messmer Ophelia 9502

We have had this heifer picked out for two summers as one of our top choices for consignment sales. As is standard with Dakota Copper females, this heifer is moderate, stylish and just a very complete all around heifer. Owning Dakota Copper females is just like buying gold in a bad economy. “They will never be worth zero.” They truly are wise long term investments.

Natural bred to multiple sires. Ultrasound due date is April 9, 2010.
Miss BHR Cartwright 8203

Lot 8203

4/23/08 1255020 100% RA

Powerful Cartwright daughter who nicely combines impressive growth and rib eye EPDs with an ideal phenotype of being deep and easy keeping, and very sound and solid made. BHR Logan 734B on the bottom side should really balance performance and maternal strengths. Her dam has an MPPA of 103.

Natural bred to multiple sires. Ultrasound due date is March 31, 2010.

Thank you to our past customers for more than 40 years of support in the purebred business.

Ian Dukart of Manning, ND, the proud owner of Miss BHR Chapter One 730 and her first calf. 730 was the high selling female at our 2009 sale.
In June, a Genex tour brought representatives from Argentina and Brazil to our ranch.

A group of young people representing many states from the National Red Angus Juniors visited our ranch in June.
Home on the Broken Heart range
The tag that guarantees **ANGUS GENETICS** and Marketing Options that WORK!

- Group Age Verified

---

**PrO-Cow**
Replacement females with all the right Tools!

The Maternal side of any cow/calf operation collectively has a genetic impact equivalent to that operation's herdbulls. Additionally, their potential to affect producers' bottom lines through reduced maintenance costs is far greater.

The Red Angus **PrO-Cow** program was developed to assist commercial producers in capturing the added value of the superior Red Angus maternal genetics by:
- Promoting the maternal benefits of their Red Angus influenced replacements.
- Expanding marketing opportunities for the female half of their calf crop.

**What's in it for you?**
- FREE listing of your replacement females on the RAAA website.
- Targeted promotion of the maternal benefits of Red Angus influenced replacements.
- Opportunity to merchandise replacements out of Red Angus, Angus Plus and Red Angus Hybrid/Composite bulls.
- RAAA staff working with industry partners & existing markets to provide greater sales opportunities.
